EDUCATION

- University of Colorado Boulder, Boulder, CO** **Anticipated: May 2028**
Bachelor of Science in Aerospace Engineering Sciences, Minor in Engineering Management
 - GPA: 4.0/4.0; Activities: Colorado Design Build Fly, BAE Space and Mission Systems Mentee (2025–2026), AIAA Executive Officer of External Relations (2025–2026)
- Embry-Riddle Aeronautical University, Daytona Beach, FL (transferred to CU Boulder)** **Aug. 2023 – July 2025**
Bachelor of Science in Aerospace Engineering, Minor in Applied Mathematics
 - GPA: 3.625/4.0; Honors: Dean's List (Fall 2023 – December 2024)

RESEARCH & PROJECTS

- Human-Robot Teaming Research – Summer Program for Undergraduate Research (SPUR), CU Boulder** **May 2026 – Present**
 - Selected for CU Boulder's competitive 10 week paid SPUR program in the College of Engineering and Applied Science, conducting human-robot teaming research under graduate and faculty mentorship.
- Wastewater Systems Modelling Research – Civil, Environmental & Architectural Engineering, CU Boulder** **Jan. 2026 – Present**
 - Selected for the FUTURE undergraduate research program and retained as a departmental research assistant.
 - Built a probabilistic systems model estimating pharmaceutical mass loads and concentrations in large scale wastewater networks across variable population sizes.
 - Integrated heterogeneous datasets, including national usage statistics, transport parameters, and toxicity constraints, to generate scalable baseline system inputs and evaluate risk margins against safety thresholds.
- Design Build Fly Competition – Colorado DBF (AIAA)** **Aug. 2025 – Present**
Testing Lead (Apr. 2026 – Present); Propulsion Engineer (Aug. 2025 – Apr. 2026)
 - Promoted to Testing Lead; direct cross functional test campaigns by designing test plans, defining data collection strategies, and aligning test objectives across engineering subteams to validate aircraft performance.
 - Collaborated with avionics and telemetry teams to implement data acquisition systems capturing 5+ data channels, and analyze flight and ground test data to inform design decisions.
 - Conducted motor, ESC, and propeller trade studies and fabricated a custom dynamic drop test stand to validate landing gear structural integrity.

WORK EXPERIENCE

- Director of Operations – Program Council, University of Colorado Boulder** **Apr. 2026 – Present**
 - Lead end to end operations for CU Boulder's student run events organization, overseeing office management, staffing, scheduling, and process improvement for concerts, films, and campus events.
 - Hired and manage a 20+ person team spanning managers to event crew, directly supervising 2 managers responsible for crew assignments and staff operations.
 - Direct corporate sponsorship and vendor outreach for large scale campus events, securing 5+ sponsors and partnerships year round from a vetted pipeline of 80+ prospects.
- Engineering Senator – CU Boulder Student Government (CUSG)** **Apr. 2026 – Present**
 - Represent College of Engineering and Applied Science students on the 105th Legislative Council, working directly with deans, directors, and university stakeholders.
 - Authored and advanced a 10 piece legislative package focused on academic resolutions, NightRide and Buff Bus transit improvements, student hardship funding, and food security.
- Peer Advisor – Program in Exploratory Studies, University of Colorado Boulder** **Jan. 2026 – Present**
 - Advise undergraduate students on course registration, academic planning, and university policy, connecting them with campus resources and departments.
 - Train incoming peer advising interns on cross registration, orientation advising, and Buff Portal systems.
 - Support admissions programming, student panels, and outreach events.

SKILLS

- Programming & Design Software:** Python, Microsoft Excel (PivotTables, Data Analysis), CATIA V5, Fusion 360, Engineering Database Systems, Technical Documentation Platforms
- Mechanical Fabrication & Prototyping:** 3D Printing, Laser Cutting, Waterjet Cutting, Woodworking, Metal Working
- Industrial & Engineering Competencies:** Process Mapping, Lean Manufacturing Fundamentals, Process Improvement, Root Cause Analysis, Inspection Techniques, Mechanical Drawing Interpretation
